

IMS SCOPE

Title	IMS SCOPE	Version	1.1
Code	GTL/DOC 06	Effective Date	22/02/2021

IMS SCOPE

When determining the scope of the IMS, the organization has considered compliance obligations, analysis of the above issues of concern, interests of stakeholders and services offered.

The scope covers services offered including: installation of business communication systems with structured voice and data cabling design and infrastructure. Our implementation involves physical and logical ring topologies that ensure non-stop availability.

Our Rollout projects comprise of Planning, Survey, Design, Fiber Optic installation, Splicing, Cable termination, Cable testing, Commissioning and Maintenance. In this way, we can control and influence our activities, products, and services within our region of operation (Kenya and the East African Region).

The nature of our activities demands that we operate in different sites every other time. However, the scope of our IMS extends to any active site of our operations at any given time.

The company claims no exclusions from the ISO 9001: 2015, ISO 14001:2015 & ISO 45001:2018 requirements.

A handwritten signature in black ink, appearing to read "A.C.", is positioned above the name of the Chief Executive Officer.

Anthony Chelimo

Chief Executive Officer
